Services offered

DVK-Tech is offering three service lines for its customers: IT Consulting, IT Development and on-site staffing. DVK-Tech Consulting Services are using its expertise in order to benefit its customer, detect the problems and suggest the complete IT solution, to grow its business.

DVK-Tech IT development services are aimed at optimisation of customer's IT investment. We are targeting to offer and integrate the solution that will correspond to your business process and team organisation.

Industry

The diversity of operational, legal environments and competition represent a perpetual challenge for all industries. DVK-Tech understands differences and appreciates each client, respecting their business processes offering a unique solution adapted to their needs, industry and company structure. Thanks to innovative technologies and our know-how IT solutions our clients achieve better results and keep processes that drive their business.

Business Policy

The policy of DVK-Tech is to conduct its business operations efficiently and reliably. An efficiency of our services is ensured by our IT teams that have both strong academic background and pertinent experience in the field of IT Applications development. The operational model used by our company has a positive impact on value chain optimisation and quality of the services delivered. Thanks to the methodology of RUP (rational unified processes) DVK-Tech is providing services that correspond to international standards such as CMMI Level 3.
